Product Designer with 11 years in design and 6 in digital product. I design products that simplify complex systems, from a Sportsbook launched in 6 months to a back-office that cut IT requests by 98 %. I work across discovery, UX/UI, design systems and CRO, alongside product, engineering, QA and business teams.

Experience

Jul 2020 – Present Madrid	Product Designer · Luckia Leading product design for the Sportsbook and Casino squads. I design and validate features for the online platform, retail betting terminals and internal back-office tools, working with product managers, developers and QA in agile teams on the WELMA and Clover design systems. Also part of the CRO & Growth team, focused on A/B testing, conversion and retention. Selected impact Own sports betting platform in 6 months: part of the design team that replaced the external provider's platform before its contract ended; I led the search redesign. It now handles ~€60K in daily bets. Promotions without developers: designed an internal tool that lets the CRM team create, test and publish bonuses on its own. IT requests fell 98 % (794 → 12) and team hours 94 %. Field work without legacy hardware: replaced 15-year-old handheld devices used by technicians and cash collectors with an offline-first web app, raising field productivity by 30 %.
